Be a part of Future Zone: Transforming the future of lighting

India is the most innovative country in the world and at the same time is very adaptive of new technologies. The Lighting infrastructure in India is changing rapidly with the emergence of Internet of Things (IoT) which is connecting appliances, spaces and lives e.g. lighting, HVAC, Wi-Fi networks. Intelligent lighting is a sum of technology and imagination, both of which are important to bring life to spaces.

FUTURE ZONE

Smart Lighting Solutions: **The way forward in changing the face of India!**

With the rapid advancement in LED technologies, there are endless possibilities to explore in the present time and a lot can be done to tune lighting according to the time of day, ambient light conditions, the weather, specific events and applications etc. which can also enhance the performance of the light, at the same time be cost effective and environment friendly.

This is Messe Frankfurt's effort to show case the '**next gen technology**' in LED Industry to the masses as they play a crucial role in changing the rules of energy conservation.

Market trends in LEDs! There is everything for everyone

- Acceptance in architectural lighting and applications
- Trend towards smart cities, smart homes, smart buildings and smart retails
- Popularity of smart wireless lighting controls
- Global lighting leaning towards LED's
- Enabling cities to benefit from connected lighting systems

Criteria for participation in **Future Zone**

- Minimum 35 sqm of exhibition space with 100% payment.
- The space will be fully furnished for the display of the products and technologies
- By invitation only
- Product / solution on offer should be cutting edge, interoperable and interactive
- Priority will be 'first-come, first-served' basis.
- Product chosen has to be provided on site by the exhibitor and fully insured
- All allied accessories, if required, to be provided by the exhibitor

The future is LED and it is well connected!

Wireless lighting enables users to control lights through mobile apps, whether in home, office or out of town. Devices are becoming more powerful and smaller with variety of sensors, the proliferation of these devices becoming connected is leading to a new paradigm

Participation fee

- Package cost ₹ 7,00,000 and € 9600 + GST
- Pre-constructed, beautifully designed 35 sqm space for the display
- Exclusive publicity in print & electronic media

**Technical committee comprises of experts from the industry and organizers decision will be final and binding.*
